

Customer Content Directional and Event Information Signage

VLINE

Government owned Rail and Bus provider

Victoria - Australia

VLine delivers regional passenger train and coach services throughout the state of Victoria, Australia

The Challenge

- Control of passenger travel information across an extensive regional network with central management
- A large contingent of content stakeholders
- The desire for low-touch operation leveraging dynamic data sources
- Minimal bandwidth utilization
- The ability to drive ultra-high-resolution video walls

The Solution

- Cloud content optimization minimizes data use without loss of quality for images
- Delivers the ability for a large number of stakeholders to manage content with defined capability for each contributor via granular permissions using the Accounts feature
- Cloud drive services are synchronized with StratosMedia for low-touch content management using simple drag and drop
- Drives ultra high-resolution video walls at native resolution ensuring maximal readability

The Platform

Featured functionality

- Cloud drive sync
- Data sources
- Video wall editor

Platform Components;

- StratosMedia Core, Digital Signage Engine, Data Engine, Player Engine

Hardware

- Windows OS Hardware
